Re: Reilly Tar and Chemical

Dear Warren:

Enclosed are pages 563 through 632 of my cross-examination of Mr. Hennessy. Please review the transcript and advise me as to follow-up questions for Messrs. Hennessy and Horner with regard to possible sources of contamination of the Reilly Deep Well (W23). As we previously discussed, a copy of the full transcript of the Hennessy examination should be obtained from EPA/Department of Justice. Also enclosed are listings of the United States, Minnesota and St. Louis Park exhibits. Please let me know if you would like copies of any of the exhibits.

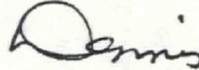

In light of our interest in waste water flow from the St. Louis Park facility, Steve Shakman has asked me to enclose a November 10, 1938 memo (Bates No. 303188) from Mr. Danz to Mr. Courtney. Although the date and Bates numbers differ, this appears to be the document referenced in the second full paragraph of page 6 of your September 20, 1982 report. We would be interested in introducing this document as an exhibit and would appreciate questions you may have on it.

Finally, would you check to see if you have additional copies of Pollution Abatement and Control in the Wood Preserving Industry, Mississippi State University Proceedings of November 17, 1970 through November 19, 1970. This volume was introduced as an exhibit at Mr. Justin's deposition.

Please give me a call once you have reviewed these materials and have framed additional questions.

Thanks for your continuing assistance.

Very truly yours,

DENNIS M. COYNE  
Special Assistant  
Attorney General
